SUMMARY

Product Manager with 4+ years turning operational complexity into 0 → 1 systems and AI-driven products that move real numbers — across fintech, digital services, and travel-tech. Built the Payout Calculation Management System 0 → 1 at Bajaj Finance, cutting FD booking turnaround from 7 days to 1 (86% faster), and led a 40-person distributed team at SmartSites, cutting project turnaround from 10 days to 2 through AI-adoption workflows. Brings fintech-grade rigor on 0 → 1 execution, hands-on data management (SQL, ETL / data-pipeline design, BI reporting), change management across cross-functional and compliance stakeholders, and a bias for simplifying complex processes into sustainable growth — not locked to one domain. Seeking Senior Product Manager roles.

Highlights: Led a 40-person distributed team at SmartSites, cutting project turnaround 10 days → 2 days • Built PCMS 0 → 1 at Bajaj Finance, cutting FD turnaround 7 days → 1 day (86% faster) • Automated operations at Ericsson, cutting downtime from hours to minutes for 1,000+ users

KEY SKILLS

Product Strategy • Roadmapping • Product Life Cycle Management • PRD & Requirements Writing • Cross-Functional Prioritization • Stakeholder Management • Change Management • Partner & Vendor Onboarding • Agile / Scrum • Sprint Planning • SQL / SQL Server • Data Management & ETL Pipelines • Power BI • Amplitude • Salesforce CRM • Data-Informed Decisions • API & System Integration • Agentic AI / Claude Code • JIRA • Azure DevOps • Figma

EXPERIENCE

Product Manager — SmartSites, Mohali, India

Sep 2025 – May 2026

Digital Marketing, Design and Development

- Owned the intake-to-delivery data flow for 30+ concurrent design projects in a distributed team spanning India and the US, centralizing status and requirements data for daily cross-verification with US-based PMs, and directing a 40-person team across social, video, web, and branding work.
- Ran process syncs on AI adoption and workflow optimization, using project and turnaround data to identify bottlenecks, cutting average project turnaround from 10 days to 2 days.

Chief Digital Growth Officer — Leading Edge Info Solutions, Mohali, India (Contract)

Sep 2024 – Dec 2024

Digital Marketing, Design and Development

- Spearheaded a 10-person team shipping internal and client websites (incl. ecommerce) end-to-end; engineered AI-based templates for the Sales → Development handoff.
- Led training for 30+ employees across 20+ sessions, driving adoption of new tools and ways of working.

Unit Manager (Product Owner — Partner Platforms) — Bajaj Finserv, Pune, India

Apr 2022 – Apr 2024

Fintech

- Led the revamp of the Partner, Customer (Experia), and Partner-Onboarding portals — adoption 2% → 45% — running the change-management side of that rollout (phased release, stakeholder communication across technology, operations, business, and compliance) and cutting Fixed Deposit booking turnaround from 7 days to 1 day.
- Built the Payout Calculation Management System (PCMS) 0 → 1, integrating with Finacle via REST APIs to remove manual Excel dependency; drove a 30% gain in sales-team efficiency and cut fraud risk 20%. Recognized with the Heroes Award.

Domain Support Specialist — Ericsson, Noida, India

Jan 2021 – Apr 2022

Telecommunications

- Automated restoration, health-check, and backup processes (Python/Shell on Linux), cutting downtime from hours to minutes for 1,000+ users and improving network reliability by 15%.

SELECTED PROJECTS

The Verification Gap — Citation Discrepancy Audit: Manually audited a real, public Deloitte report for citation-fabrication risk — found 51 of 100 in-text citations had no matching bibliography entry, mapped each to its exact page and claim, then built a full discrepancy-detection framework and platform architecture from the finding.

Flight Booking Product Teardown (MakeMyTrip): Funnel and requirements teardown with three personas, a journey/funnel map, RICE/MoSCoW-scored recommendations, and HEART success metrics and OKRs.

AI Trip Planner — PRD (“Wayfare AI”): End-to-end PRD: goals/non-goals, prioritized P0–P2 requirements, user stories, a phased launch plan, and success metrics.

Travel Support AI Copilot: Agentic customer-support assistant (live interactive demo) that both answers and executes — cancellations, refunds, baggage queries, date changes — with guardrails and human escalation for high-risk cases.

SQL & Amplitude Analytics Practice: Hands-on data-management work: SQL querying (joins, CTEs, window functions, cohort retention) against a SaaS subscriptions dataset, plus event-level segmentation, funnels, and retention analysis in a live Amplitude account — including a real product bug found and fixed.

EDUCATION

MBA, Business Analytics — Amity University, 2024–2026 (Correspondence)

B.Tech, Information Technology — Jaypee University of Information Technology, Solan, 2016–2020 (Full Time)
